- Pashto (Fluent)
- Farsi(Basic)

PROFILE

As a Full Stack Developer, I'm passionate about mastering both front-end and back-end technologies. My expertise includes HTML, CSS, JavaScript, and React for building interactive user interfaces, as well as PHP and MySQL for seamless back-end development and database management.

I'm committed to writing clean code, creating responsive designs, and delivering user-centered solutions. With each project, I aim to continuously improve and stay updated with the latest web development trends and best practices.

WORK EXPERIENCE

Frontend Development:

- Designed and developed responsive user interfaces using HTML, CSS, Bootstrap, and Tailwind CSS.
- Implemented interactive UI components using JavaScript, jQuery, and AJAX for a smooth user experience.
- Ensured cross-browser compatibility and mobile responsiveness for seamless usability.
- Optimized frontend performance by reducing load times and improving asset management.

Backend Development:

- Developed and maintained server-side logic using PHP and Laravel.
- Built RESTful APIs for seamless communication between frontend and backend.
- Integrated authentication and authorization systems for secure user access.
- Optimized backend code for scalability and performance.

Database Management:

- Designed and managed MySQL databases, ensuring data integrity and security.
- Implemented database normalization and indexing to improve query performance.
- Integrated dynamic data fetching with AJAX for real-time updates.
